

SENSITIVE

FISH MEDIUM BREED

Complete diet for medium size breed adult dogs from 1 year of age between 10 and 25 kg

Appetitt is a functional dog food enriched with active ingredients derived from Norwegian nature. Each product is specially adapted to the different nutritional needs of all breeds, so you can always find a food that is tailored exactly to your dog's requirements.

Sensitive Fish Medium Breed is formulated for sensitive medium breed dogs. The food is rich in highly digestible hydrolysed protein from fish. This is a single protein dog food, contains only proteins from marine sources, making it a good option for dogs that are sensitive to chicken or other animal proteins.

With the exception of rice, the food is grain free and high in hydrolysed proteins. Thus, the food is low in ingredients that can lead to intolerance and allergies.

Antarctic krill supports your dog's skin, coat and joints with the essential omega-3 fatty acids, EPA and DHA in the form of phospholipids. Contains natural glucosamine and chondroitin from fish for joints and bones. Natural vitamin E and rosemary, for skin, coat, joints and your dog's overall health.

Fructo-oligosaccharides (FOS) from vegetable fibres and mannan-oligosaccharides (MOS) for digestion. Beta-glucans from yeast for your dog's overall health.
