

EXTREME

Complete diet for highly active adult dogs

Appetitt is a functional dog food enriched with active ingredients derived from Norwegian nature. Each product is specially adapted to the different nutritional needs of all breeds, so you can always find a food that is tailored exactly to your dog's requirements.

Appetitt Extreme is formulated for highly active dogs with high calorie needs. High content of fats, prebiotic substances and easily digestible proteins of animal and marine origin to help your dog achieve peak performance during high-energy events such as strenuous training and hunting. Combined with carnitine, the high fat content stimulates increased fatty acid burning. With the exception of rice, the food is grain free and high in hydrolysed proteins. Thus, the food is low in ingredients that can lead to intolerance and allergies.

With natural antioxidants such as vitamin E and rosemary and with natural glucosamine and chondroitin from salmon and chicken for joint and bone health. Antarctic krill supports your dog's skin, coat and joints with the essential omega-3 fatty acids, EPA and DHA in the form of phospholipids. Fructo-oligosaccharides (FOS) and mannan-oligosaccharides (MOS) for digestion and beta-glucans from yeast for the overall health of your dog.

Composition

Animal fat from chicken, dried animal protein from chicken, potato starch, hydrolysed animal protein from chicken (11 %), rice, pea starch, dried Antarctic krill (*Euphausia superba*), hydrolysed marine protein from salmon (3 %), dried marine protein from fish, dried beet pulp, lignocelluloses, fish oil, calcium carbonate, sodium chloride, fructo-oligosaccharides (FOS), mannan-oligosaccharides (MOS), potassium carbonate, beta-glucans from yeast, rosemary.

Feeding guide

Appetitt Extreme has high energy and nutrient content that makes it perfect for dogs with a high level of general activity when training, hunting or racing. A significant amount of the energy comes from the fat content, which is positive for the performance of your dog during endurance activities. The feeding guide gives the average amount of daily feed related to your dog's body weight and age. The feed amount may vary +/- 20 % depending on each dog's individual requirements for maintaining optimal body weight. Your dog should always have access to fresh drinking water. Store in a dry and cool place.
