

# SENIOR

Complete diet for senior dogs older than 7 years

Appetitt is a functional dog food enriched with active ingredients derived from Norwegian nature. Each product is specially adapted to the different nutritional needs of all breeds, so you can always find a food that is tailored exactly to your dog's requirements.

Appetitt Senior is formulated and balanced to meet the needs of senior dogs. The ageing process in dogs varies and the transition to a senior food must be assessed individually for each dog. The food has a moderate protein content. Carnitine contributes to energy and fat metabolism and may reduce the risk of obesity. Psyllium husk from psyllium seeds is high in fermentable and water-soluble fibres and might contribute to good gastrointestinal function. Psyllium has very good water-binding ability and other swelling properties. It might thus also contribute to increased satiety. Except for rice, the food is grain free and high in hydrolysed proteins. Thus, the food is low in ingredients that can lead to intolerance and allergies. With natural antioxidants such as vitamin E and rosemary and with natural glucosamine and chondroitin from salmon and chicken for joint and bone health. Antarctic krill supports your dog's skin, coat and joints with the essential omega-3 fatty acids, EPA and DHA in the form of phospholipids. Fructo-oligosaccharides (FOS) and mannan-oligosaccharides (MOS) for digestion and beta-glucans from yeast for the overall health of your dog.
