

LIGHT

Complete diet for adult dogs that gain weight easily or suffer from obesity

Appetitt is a functional dog food enriched with active ingredients derived from Norwegian nature. Each product is specially adapted to the different nutritional needs of all breeds, so you can always find a food that is tailored exactly to your dog's requirements.

Appetitt Light is formulated for dogs that are overweight or prone to weight gain. The food has a moderate fat content and the carefully adapted level of dietary fibre makes it easier to control your dog's calorie intake. Appetitt Light contains carnitine, which might have a positive effect on energy and fat metabolism. Psyllium husk from psyllium seeds is high in fermentable and water-soluble fibres and might contribute to good gastrointestinal function. Psyllium has very good water-binding ability and other swelling properties. It might thus also contribute to increased satiety. With the exception of rice, the food is grain free and high in hydrolysed proteins. Thus, the food is low in ingredients that can lead to intolerance and allergies. With natural antioxidants such as vitamin E and rosemary and with natural glucosamine and chondroitin from salmon and chicken for joint and bone health. Antarctic krill supports your dog's skin, coat and joints with the essential omega-3 fatty acids, EPA and DHA in the form of phospholipids. Fructo-oligosaccharides (FOS) and mannan-oligosaccharides (MOS) for digestion and betaglucans from yeast for the overall health of your dog.
