

APPETITT KITTEN

For kittens up to 1 year of age

Appetitt is a functional cat food enriched with active ingredients derived from Norwegian nature. The various products in our wide assortment have been developed to meet different nutritional needs, so everyone can find a food that's perfectly adapted to their cat.

Appetitt Kitten is rich in protein from animal and marine ingredients. Its high protein digestibility and essential amino acid content are adapted for growing kittens up to approx. 1 year of age. The high energy and nutritional content means that Appetitt Kitten is also suitable during gestation and lactation. With the exception of rice, the food is grain free and high in hydrolysed proteins. Thus, the food is low in ingredients that can lead to intolerance and allergies. Natural glucosamine and chondroitin from salmon and chicken for joint and bone health.

Furthermore, Appetitt Kitten contains Antarctic krill, providing your kitten with the vital omega-3 fatty acids, EPA and DHA in the form of phospholipids. Ideal ratio of omega-3/omega-6 fatty acids and a high content of vitamin E and rosemary for your kitten's joints, skin, coat and overall health. Fructo-oligosaccharides (FOS) from beet fibre for your kitten's gastrointestinal health. Contains beta-glucans from yeast for the overall health of your kitten. Appetitt Kitten contain natural antioxidants such as vitamin E and rosemary.

Appetitt Kitten is also suitable for neutered and sterilised (spayed) young cats.
